Door security

Abstract

Contents of abstract :

This invention was made by the blessing of Allah .so it can prevent doors speciallyb the wooden one accidentally closing on kids hands .

Purpose of the research :

This product was made of three pieces of wood connected to each others so it can be placed on the top of the door and it can be fixed by removable tack .

Procedures :

Its made of three pieces of wood A& B and C A&C = have the same tallness and the same thickness , B= the thickness of the door.

Data :

This design got high importance of targeting the required doors .

It can be placed easily from door to another.

Conclusions :

It can be made from other materials in order be smaller lighter and more practical.

評語

本作品旨在設計製造簡易而可防止因門戶驟合時造成意外的傷害。本作品只利用四片木板組裝而成，但其實用價值甚為可觀。

本作品若能加強設計概念、流程、步驟與理論推衍，則可讀性更高。
